Microsoft Certified Power Platform Developer (PL-900) with 2+ years of experience in Power Apps, Power Automate, SharePoint Online, and SPFx. Delivered 8+ enterprise solutions across healthcare, government, and logistics, reducing manual processing by up to 60% through scalable Microsoft 365 applications and strong stakeholder collaboration.

Professional Experience

Power Apps Developer

Techtonica Technologies Pvt. Ltd. (Zest Consulting / Zclus India)

Dec 2024 – Present
Mumbai, India

- Architected 3+ Canvas and Model-Driven Power Apps with role-based access and event-triggered SharePoint approval workflows, cutting processing time by 40%.
- Partnered with Fairview Health Services (USA) to deliver a component-based solution with delegation-aware Dataverse queries, scaling to 500+ concurrent users.
- Spearheaded SPFx modernisation for BART (US Government), migrating 10+ legacy C# on-premises modules to React-based SharePoint Online web parts.
- Instituted Power Platform ALM across Dev, UAT, and Production with CI/CD pipelines, achieving zero-downtime releases and full version traceability.

SharePoint Developer

TextCode Technology

Apr 2024 – Dec 2024
Pune, India

- Converted 4+ client briefs into SharePoint Online and Power Apps solutions through analyst workshops, slashing approval cycle times by 60%.
- Led UAT walkthroughs of the Vacation Approval System for 200+ employees, refining calendar UI and notification flows based on direct user feedback.
- Delivered 5+ maintenance-tracking modules for Kaizen Shipping (Thailand), covering 100+ assets and lifting data accuracy via normalised SharePoint schemas.
- Resolved CheeseGeek UK data-quality failures with cascading dropdowns and conditional validation, cutting submission errors by 35% and earning client commendation.

Software Trainee Engineer

Credentek Pvt Ltd

Jan 2023 – Jun 2023
Pune, India

- Contributed to AnyRecon, a web-based reconciliation system for Jana Bank and L&T Finance, assisting in migrating to a multi-threading architecture and reducing processing time by 65%.
- Built 3+ frontend features including a BBPS payment module using ReactJS, integrated with financial workflows for L&T Finance and Jana Small Finance Bank.

Design Engineer

Bharat Engineering Corporation

Jun 2021 – Jul 2022
Aurangabad, India

- Migrated 50+ engineering documents to SharePoint Online with granular permission tiers and structured library taxonomy, cutting team retrieval time by 50%.
- Administered SharePoint Online site collections, managing user permissions, site settings, and content types to ensure secure and organised access across departments.
